

Ravi Kumar

Una, Himachal Pradesh, India | raviksb90@gmail.com | [Personal Website](#)

Full-Stack Web Developer | React.js / Next.js | Node.js / MERN | PHP / MySQL | SaaS, Integrations & Electron Applications

PROFESSIONAL PROFILE

Senior-level full-stack web developer with 9+ years of experience delivering web applications, SaaS platforms, admin systems, restaurant and clinic tools, survey products, booking systems, real-time applications, payment-enabled products, and Electron desktop/kiosk applications. Strong across React.js, Next.js, Node.js, Express.js, MERN, PHP, MySQL, MongoDB, PostgreSQL, Firebase, Electron.js, and REST API development.

Strong fit for roles that need practical end-to-end delivery: turning requirements into responsive interfaces, backend APIs, database-backed workflows, admin portals, payment and communication integrations, multilingual product features, cloud-hosted deployments, and production-ready desktop packaging. Combines modern JavaScript product development with legacy PHP/MVC maintenance and enhancement, making this profile well suited to teams that need both new product development and improvement of existing systems.

TECHNICAL STACK

Frontend: React.js, Next.js, Redux, React Native, Angular, Vue.js, Tailwind CSS, Bootstrap, Material UI, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js, PHP, Laravel, YII, Slim, CodeIgniter, REST APIs

Databases: MySQL, MongoDB, PostgreSQL, Firebase

Cloud, Desktop & Platforms: AWS, DigitalOcean, Google Cloud, Electron.js, Linux ARM builds, Windows builds, electron-builder

Payments & Business Integrations: Stripe, PayPal, Authorize.Net, QuickBooks, Dropbox, Gmail API, Twilio, SendGrid, SSO

Real-Time & Product Workflows: WebRTC, Socket.io, Firebase authentication, Firebase storage, Firebase database, multilingual applications, QR ordering, scheduling, admin portals

AI, APIs & Productivity Tools: OpenAI API, Segmind API, Cursor, Claude, OpenAI/ChatGPT, AI-assisted coding, debugging, refactoring, documentation, and productivity workflows

Practices: Agile development, responsive UI development, API design, third-party integrations, production fixes, release support, deployment support, desktop production packaging

CORE DELIVERY STRENGTHS

- End-to-end product feature delivery across UI, API, database, integrations, release support, deployment workflows, and production fixes.
- SaaS and platform development across admin portals, subscriptions, scheduling, survey creation, booking workflows, multilingual templates, and multi-role dashboards.
- Integration-heavy development involving payments, file/document services, email/SMS communication, SSO, QuickBooks, Dropbox, Gmail API, Twilio, SendGrid, and Firebase workflows.
- Cross-platform desktop development using Electron, React, Node.js, IPC-driven architecture, hardware interaction, report automation, kiosk flows, Linux ARM builds, Windows builds, and electron-builder.
- Legacy modernization and product enhancement across PHP/MySQL, JavaScript, React/Next.js, Node.js, Angular, Vue.js, and REST API applications.
- Uses modern developer-productivity tools such as Cursor, Claude, and OpenAI/ChatGPT to accelerate coding, debugging, refactoring, technical research, documentation, and implementation planning.

PROFESSIONAL EXPERIENCE

Web Developer | 76East Technologies

Dec 2018 - Present | 7.5 years

- Build and maintain SaaS platforms, real-time apps, admin systems, restaurant/clinic/school tools, survey products, booking systems, and desktop automation applications.
- Take product features from requirement clarification through UI implementation, API/database workflows, integrations, release support, and production fixes.
- Develop responsive user interfaces, REST APIs, database-backed workflows, authentication flows, admin panels, payment flows, and third-party integrations.

- Implement product integrations with Stripe, PayPal, Authorize.Net, QuickBooks, Dropbox, Gmail API, Twilio, SendGrid, and SSO.
- Support deployment or hosting workflows across AWS, DigitalOcean, Google Cloud, Firebase, and production desktop packaging environments.
- Build multilingual product experiences, scheduling flows, QR ordering tools, role-based dashboards, and operational admin portals.
- Support client-facing discovery and business-development conversations when needed, translating requirements into product features and delivery tasks.

Selected Project Portfolio - 76East Technologies

Loompin.com - Survey Creation and Distribution SaaS

Link: <https://loompin.com>

Stack: MERN, Stripe, AWS, SSO, AI chat

- Built product features for a survey creation and distribution SaaS platform.
- Developed import/export workflows for survey content and response-related data.
- Implemented multilingual templates and scheduling workflows.
- Built and maintained admin portal functionality for platform management.
- Supported Stripe billing, AWS deployment support, SSO flows, and AI chat integration.
- Worked across frontend, backend, admin, data, integration, and product workflow surfaces.

Lockerize - Smart Locker Kiosk Platform

Stack: Electron.js, React, Node.js, Authorize.Net, Linux ARM, Windows

- Built a production-grade Electron kiosk system for smart locker workflows.
- Designed IPC-driven architecture between the React UI and system logic.
- Implemented hardware interaction flows and offline-safe operating behavior.
- Integrated Authorize.Net payment handling into the kiosk workflow.
- Delivered cross-platform builds for Linux ARM and Windows.
- Supported production packaging and kiosk-style deployment constraints.

AxxonLabs Report Automation Desktop App

Stack: Electron.js, React.js, Node.js, Excel/image parsing, PDF generation, electron-builder

- Built an Electron + React desktop application for lab/report automation workflows.
- Designed a full data processing pipeline from Excel and image inputs to analysis and multi-page PDF reports.
- Implemented structured parsing, rule-based insights, automated report generation, and report preview workflows.
- Added progress tracking and user-facing preview UX for long-running report generation steps.
- Packaged production builds using electron-builder.
- Delivered desktop automation for workflows that would otherwise require manual report preparation.

Studiio.au - Photography Studio Management

Link: <https://studiio.au>

Stack: React.js, Node.js, MySQL, QuickBooks, Dropbox

- Built product features for a photography studio management platform.
- Developed booking workflows, photo sharing features, and multi-role administration.
- Integrated QuickBooks for business/accounting workflows.
- Integrated Dropbox for file and media handling.
- Worked across UI, backend, database, role-based access, and third-party services.

Platerate.com - Online Food Ordering and Rating Platform

Link: <https://platerate.com>

Stack: Next.js, Node.js

- Enhanced the platform UI for an online food ordering and rating product.
- Implemented new features across active project phases in 2019 and 2025.
- Worked across Next.js frontend development and Node.js backend-supported workflows.
- Supported product improvements for ordering, rating, and user-facing platform experiences.

AllMenu.eu - QR Restaurant Menu System

Link: <https://allmenu.eu>

Stack: MERN, DigitalOcean, QR menu/order workflows

- Built multilingual QR menu workflows for restaurants.
- Implemented QR-code menu access and QR ordering functionality.

- Supported MERN-based product features and DigitalOcean-hosted deployment workflows.
- Worked on restaurant-facing menu management and customer-facing ordering experiences.

Memorygram - Collaborative Story Publishing Platform

Link: <https://memorygram.com>

Stack: React.js, Node.js, MySQL, Froala editor

- Built writing tools for collaborative story publishing.
- Integrated the Froala editor into the content creation workflow.
- Developed collaboration workflows for multi-user writing and publishing use cases.
- Worked across React.js frontend, Node.js backend, and MySQL-backed data flows.

LovestrongMarriage - Church Retreat Management

Link: <https://lovestrongmarriage.com>

Stack: React.js, Node.js, MySQL

- Built event creation workflows for church retreat management.
- Developed participant management functionality.
- Supported administrative workflows for retreat organization and tracking.
- Worked across React.js, Node.js, and MySQL product surfaces.

Edvantum.com - School Management System

Link: <https://edvantum.com>

Stack: React.js, Node.js

- Developed school-management modules for class, bus, and subject management.
- Built UI and backend-supported workflows for educational administration.
- Supported product features for organizing school operational data.

Chat App Prototype - Real-Time Text and Video Chat

Link: <http://66.235.194.119:6974/chat-app/>

Stack: React.js, Node.js, MongoDB, WebRTC, Socket.io

- Built a real-time chat application with text and video communication options.
- Used Socket.io to support real-time messaging behavior.
- Implemented video chat workflows using WebRTC.
- Worked across React.js frontend, Node.js backend, and MongoDB-backed data flows.
- Enhanced real-time communication experiences through both text and video chat options.

OpenAI API Chatbot - Student Education Guidance

Link: <http://66.235.194.119:6974/ai-app/chat>

Stack: React.js, Node.js, OpenAI API, AI

- Built a chatbot using the OpenAI API for personalized response generation.
- Tailored the application to assist Indian students in making informed education-path decisions after 10th grade.
- Developed a React.js frontend and Node.js backend workflow for prompt handling and AI response delivery.
- Worked with AI-assisted conversational UX, education-focused prompts, and API-backed chat behavior.

Text to Image Generator - AI Image Generation App

Link: <http://66.235.194.119:6974/ai-app/image-generation>

Stack: React.js, Node.js, Segmind API, AI

- Built a React.js application that generates images from text descriptions.
- Integrated Segmind API to convert user prompts into creative visual outputs.
- Developed frontend and backend workflows for submitting text prompts and displaying generated images.
- Supported AI-based creative tooling by turning textual content into visual representations.

Chaukidar App - Directory and File Monitoring Tool

Stack: Electron.js, React.js, Node.js

- Created an Electron desktop application for directory and file monitoring.
- Built a React-based UI for monitoring controls and status visibility.
- Implemented Node.js-based system/file interaction workflows.

Banknews.tv - Financial News, Analytics and Research Platform

Link: <https://banknews.tv>

Stack: PHP, MySQL, HTML, JavaScript

- Built backend features using PHP and MySQL.
- Built frontend features using HTML and JavaScript.
- Supported subscriptions for a platform serving banks, insurance firms, real estate users, and regulators.
- Enabled news aggregation, analytics, financial data visualization, and interactive charts.

Pogo.pro - Homeowner and Professional Quote Platform

Link: <https://pogo.pro>

Stack: PHP, MySQL, HTML, JavaScript, CSS

- Built workflows for connecting homeowners with service professionals.
- Supported quote exchange, project management, and collaboration features.
- Worked across PHP/MySQL backend logic and HTML/JavaScript/CSS frontend implementation.

Chrome Extensions - BeHappyful Gmail Signature Quotes

Stack: HTML, CSS, JavaScript, Google Apps Script, Gmail-related workflows

- Built the BeHappyful Chrome extension for adding daily quotes as Gmail signatures.
- Implemented settings controls for user customization.
- Worked with HTML, CSS, JavaScript, and Google Apps Script.

Travel Smart - Collaborative Trip-Planning Application

Stack: Firebase, authentication, storage, database, maps, offline workflows

- Built trip-planning features with real-time collaboration.
- Supported interactive maps and offline access workflows.
- Implemented Firebase-based authentication, storage, and database behavior.

Popular Maternity Centre - Online Clinic Portal

Link: <https://popularmaternitycentre.com>

Stack: Node.js, Angular, payment gateway, SMS API

- Built clinic portal features for appointment booking.
- Enhanced admin workflows for clinic operations.
- Added payment gateway support and SMS API integration.
- Worked across Node.js backend and Angular frontend features.

EasyMobileRecharge.com - Online Recharge Platform

Link: <https://easymobilerecharge.com>

Stack: PHP, MySQL, JavaScript, REST APIs

- Delivered UI upgrades and feature improvements for an online recharge/top-up platform.
- Built and supported APIs for Android app integration.
- Supported mobile recharge, TV subscription, and other top-up workflows.
- Worked across PHP/MySQL, JavaScript, API development, and integration support.

Web Developer | Aquilis Web Solutions

Apr 2017 - Nov 2018 | 1 year 8 months

- Developed PHP, MySQL, and JavaScript features for EasyMobileRecharge.com.
- Supported recharge/top-up workflows for mobile and TV subscriptions.
- Implemented UI upgrades, functionality fixes, and REST API support for Android application integration.
- Worked across backend API development, MySQL-backed data flows, JavaScript UI updates, and integration support.

EDUCATION

B.Tech, Computer Science

Himachal Pradesh University | 2009 - 2013

12th, Science - Non-Medical

BBNB Govt. Sr. Sec. School, Saloh, Una | HPBOSE | Marks: 334/500 | Passout Year: 2009

10th

Govt. High School, Badhera, Distt Una | HPBOSE | Marks: 447/700 | Passout Year: 2006

CERTIFICATION

Web Development (PHP & MySQL)

WebtechLearning Web Development Education Academy, Chandigarh
